GROWTH MARKETING CASE STUDY #1

B2C Membership & Digital Offer Funnel Scaling (21-Day Organic Execution)

Prepared By: Tabbita Jael | **Focus:** Instagram DM Automation & Funnel Optimization

Organic Instagram-to-Membership Funnel Makeover

CLIENT CONTEXT & CORE CHALLENGE

A digital self-development and mindset membership community for women ($35/mo recurring subscription) with an active Instagram following of 8,500+ experienced high organic Reel views but stagnant membership sign-ups. Followers engaged heavily with content but experienced severe drop-off at the bio link and sales page. Additionally, the existing email software had zero automated re-engagement workflows set up to recover cart drop-offs.

+214%	4.8x	$4,850
Monthly Active Sign-ups	DM-to-Funnel Conversion	Recovered Recurring Revenue

21-DAY STRATEGIC EXECUTION ROADMAP

- **Days 1–5 (Bio & DM Trigger Audit):** Overhauled profile bio positioning, updated pinned offer posts, and implemented comment-to-DM triggers (e.g., *"Comment 'GLOW' for a free pass"*) to bypass manual link friction.
- **Days 6–12 (Landing Page Usability & Friction Removal):** Restructured the primary membership page—moved video testimonials above the fold, added a sticky mobile CTA, and streamlined payment to a 1-step checkout.
- **Days 13–21 (Email Re-Engagement & Reel Hook Optimization):** Built a 5-part automated email recovery sequence targeting incomplete checkouts and implemented share-optimized Reel caption hooks designed for algorithm discovery.

SUMMARY OUTCOME & TAKEAWAY

By bridging organic Instagram attention directly into automated DM pathways and eliminating friction on the landing page, we unlocked high recurring revenue from an existing audience without spending a single dollar on paid advertising.
